

Get a head start in your **research** or **business reports** by citing authoritative market sentiments, experts' reports and dossiers! With Statista, staff and students can get all the relevant information they need in one place.

Statista is a global business data platform of a multi-disciplinary that provides industry and business data across 600 industries which would be helpful for the various ITE courses such as hospitality, engineering, business, IT and even health-sciences. Statista.com consolidates statistical data on over 80,000 topics from more than 22,500 sources (including both national and international data) and provides over 1 million statistics and facts. The statistics database is well-known and acknowledged throughout the world as basis for fast and comprehensive research for numbers, data, and facts.

Statista can provide information on:

- Market segment identification (target audience)
- Market trends
- Brand sales, including competitor brands
- Popularity of a product
- Niche markets
- Rankings by product category, country

Tools such as **customised analysis with data modelling** and **infographics** are also available.
